

**School of Earth and Environmental Sciences  
Spring 2010 Colloquium**

<b>Date</b>	<b>Speaker</b>	<b>Title</b>	<b>Host</b>
2/10 (Wed)	Douglas Burbank University of California, Santa Barbara	Tectonic geomorphology of collisional orogens: climate, erosion, and tectonics	Brueckner
2/22	Alfredo Morabia CBNS	Can the way you commute to Queens College have consequences for your health?	Rouff
3/1	Allan Kolker USGS	Determining Atmospheric Emissions from Energy Sources- How the USGS is Involved	Ludman
3/8	Phillip Orton Columbia University	Studying estuary mixing and air-sea exchange processes using autonomous platforms and robotic boats	O'Mullan
3/22	Qiang Yang SEES Student Seminar	Arsenic in bedrock aquifers in the greater Augusta area, Maine	Advisor: Zheng
4/12	Yuanzhi Tang Harvard University	Understanding uranium speciation in complex environments: A molecular scale laboratory approach	Rouff
4/19	George Hendrey SEES	Limiting Climate Change for Fun and Profit	
4/26	Sweeta Chauhan Rutgers University	TBA	Rouff
5/3	Mark Benotti	TBA	Stewart
5/10	Rahul Sahajpaul SEES Student Seminar	Assessing Li and other leachable geochemical proxies for paleo-salinity in lake sediments from the Mono Basin CA (USA)	Advisor: Hemming

**Mondays from 12:15-1:15 pm in SB Room C207 unless otherwise indicated**
