

**School of Earth and Environmental Sciences  
Spring 2011 Colloquium**

<b>Date</b>	<b>Speaker</b>	<b>Title</b>	<b>Host/Advisor</b>
2/14	Kirk Knobelspiesse, Columbia University	Atmospheric aerosol optical property retrieval with scanning polarimeters	Balestra
3/9 Wed	Ellen Thomas, Yale University Wesleyan University	The footprint of human activity in Long Island Sound	Balestra
3/21	Gang Liu, BNL	Turbulence characteristics of the shear-free convective boundary layer driven by heterogeneous surface heating	Yi
3/28	Hongbin Chen, SEES  Caroline Farkas, SEES	Cooperative control of katabatic flows within canopies with terrain slope, canopy structure, and thermal velocity  CO2 Transport over Complex Terrain	Yi
4/4	Nick Coch SEES	Lunar sedimentology and martian morphology	
5/2	Farnosh Saeedi, BCC, CUNY	Stratigraphic Record of the Cretaceous/Paleogene (K/Pg) Boundary within the U.S. Middle Atlantic Coastal Plain	Rouff
5/9	John Saul, ORYX, Paris, France	Circular scars as terrestrial vestiges of the late heavy bombardment	Speidel
5/16	George Hendrey, SEES	TBA	

**Mondays from 12:15-1:15 pm in SB Room C207 unless otherwise indicated**
