Installing Office on Your Desktop

You can use your Office 365 account to install Office on up to FIVE devices (PCs, Macs and mobile devices).

To start the install click the Settings gear and then Office 365 settings.

On the left hand side click on Software.

For more information on installation requirements and help click on the link at the bottom of the Office 365 screen that reads Review System Requirements.

Click on Install.

This will now install the latest version of Office on your device.
