

MAJOR: FAMILY & CONSUMER SCIENCES

SPECIALIZATION – FOOD MANAGEMENT STUDIES

Mission: To educate students in the principles of food management and its related disciplines and to develop an understanding of the role food service operations have in food sustainability, culture, and the health and well-being of people served in hospitals, restaurants and the food industry.

GOALS:

- To impart fundamentals of food science, nutrition, meal planning, food sustainability, institutional management, and finance to plan and supervise meal production to enhance the health and well-being of a culturally diverse community.
- To apply this knowledge to the work setting and develop the student's ability to solve problems and think critically in all areas of management within the food industry including restaurants, hospitals, nursing homes, schools, farm-to-table operations, and community programs.

Note: This track does not meet the Academy of Nutrition & Dietetics requirements to receive a Verification Statement which is necessary for becoming a Registered Dietitian (RD).
