

Queens College

Biology Department Colloquium Schedule

Spring 2015 – Wednesdays at 11:10am, NSB D-139

Host

- Feb 4 **Patrice Yarbough**, Universities Space Research Association - **Why on Earth Should We Study the Health Issues of the Space Environment?*** Zakeri
- Feb 11 **J. Alan Clark**, Fordham University - **Bird Migration Thru Urban Landscapes** Waldman
- Feb 25 **David Matus**, Stony Brook University - **Cell Cycle Regulation of Cell Invasive Behavior: Insights from Nematode Uterine-vulval Development** Savage-Dunn
- Mar 4 **Sasha Levy**, Stony Brook University - **Quantitative Evolutionary Dynamics Using Ultrahigh-Resolution Lineage Tracking** Dennehy
- Mar 11 **Xiajun Li**, Mount Sinai School of Medicine - **ZFP57 is a Master Regulator of Genomic Imprinting** Weinstein
- Mar 18 **Javier Monzon**, Stony Brook University - **Tick Talk: Evolutionary Genomics of a Rapidly Expanding Disease Vector** Ma
- Mar 25 **Michael Hickerson**, City College - **Comparative Population Genomics for Community-scale Inference** Lahti
- Apr 1 **Erika Svendsen**, U.S. Forest Service - **Social Use, Value and Social Ecological Meaning in NYC's Natural Areas** Waldman
- Apr 15 **Juergen Polle**, Brooklyn College - **Regulation of Metabolism in Green Algae** Melendez
- Apr 22 **Merry Camhi**, Wildlife Conservation Society - **Shark Therapy: Here, There, and Everywhere** Waldman
- Apr 29 **Jennifer Jacquet**, New York University - **The Predator-prey Relationship between *H. sapiens* and Marine Species** Waldman
- May 6 **Harold Michels**, Copper Development Association - **Antimicrobial Copper: Killing Bacteria and Reducing Hospital Acquired Infections** Holtzman
- May 13 **Theodore Muth**, Brooklyn College - **Plant Transformation by *Agrobacterium tumefaciens* - Tracking the T-DNA** Dennehy

* MARC-Sponsored
