Greetings!
Welcome to the second annual QCDI News!
Read on for the 2018–2019 news of the Queens College Dietetic Internship (DI), activities, career updates on past graduates, and profiles of preceptors.

Allison Charny, MSEd, RDN, CDE, CDN
Program Director
allison.charny@qc.cuny.edu
The QCDI, accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND), provides the necessary practice experience and preparation for entry into the field of dietetics as a registered dietitian (RD). The dietetic internship is busy preparing for its meeting with ACEND reviewers during the program’s reaccreditation site visit, scheduled to occur this fall—a very important event for the DI!

**Accreditation Council for Education in Nutrition and Dietetics**

The accrediting agency for the Academy of Nutrition and Dietetics

The internship concentration is community nutrition, emphasizing work in a wide range of community, clinical, and management sites and developing interns’ skills to serve the diverse populations of New York City. Rotations provide a thorough, well-rounded internship, enabling interns to confidently begin work in many areas of dietetics (as noted below under Alumni News). We are extremely proud to say that 100 percent of QCDI graduates of the 2018 and 2019 DI years tell us that they have passed the RD credentiaing exam!

**New Practice Sites**

New practice locations for this year were St. Johnland Center for Nursing, Gurwin Jewish Nursing Home, and St. Francis Hospital for Management practice; Queens Hospital Outpatient Center, Alissa Rumsey, RD (private practice), Elmhurst Hospital WIC, and American Heart Association for Community Counseling and Programs experience; and Rego Park Healthcare for Extended Care and Elmhurst Hospital for Acute Care experience. We also look forward to working with new sites that will be accepting interns in the upcoming year: St. Mary’s Hospital for Children, Elmhurst Hospital outpatient center, and Public Health Solutions nutrition programs for Women, Infants, and Children.

**Preceptor Recognition**

To recognize the outstanding work of all QCDI preceptors, dietetic interns prepared and delivered a certificate of appreciation and spring plant with a special Thanks for “Rooting” for Us! to all practice sites for Preceptor Month, April 2019.

**Preparation for Practice and RDN Exam**

The program supports the training of its interns through course work in Advanced Medical Nutrition Therapy in the Fall semester and a graduate course of their choosing—usually Advanced Counseling or another course, with three 2018–2019 interns completing the graduate course in Nutrition Support. Internships and course work contribute to completion of the master’s degree in Nutrition Specialization.

Professors Maria Biondi, Judith Batashoff, and Sandi Westfal were guest speakers on seminar topics in Food Science, Food Service Management Math, and Nutrition-Focused Physical Exams, respectively. New DI seminar topics this year were Case Practice for Pregnancy and Pediatrics by Professor Rachel Taniey, MS, RD, and Topics in Sustainability by Abby Cannon, JD, RD. Interns of the Northwell Dietetic Internship Program joined the QCDI for Coding and Billing for Nutrition Services by Healthy-Bytes, and Current Public Policy Issues was provided by the LIAND public-policy committee representatives.
Case Reports included such topics as eating disorders, uncontrolled diabetes in pregnancy, heart failure in the elderly, pediatric allergy, and Crohn’s disease. Management projects evaluated various types of patient service operations. Community Needs Assessment projects addressed food issues of communities of campus athletes, corporate wellness employees, inner-city housing residents, and outpatients with various chronic diseases. (See 2018–2019 Rotation Highlights below.)

The QC dietetic interns supported Queens College Homecoming by creating a harvest table highlighting the sustainable practices of the FNES garden.

Outcomes Research Projects
This year’s interns worked in teams on their Outcomes Research Projects, gaining further experience toward the program’s community emphasis as well as application of the basic research process.

In their Campus Food Pantry intervention and evaluation, Elizabeth Eisnor, Nazish Pervez, and Renee Mazzotta researched the issue of food insecurity among college students. Using items from the food pantry, they provided an educational intervention concerning healthy meal planning on a budget. Pre- and post-intervention survey results indicated increased knowledge and awareness among students about accessing and utilizing the Queens College Knights Food Pantry.

Ashley Barrueco, Nicole Castro, and Joanna Wytwier took the lead in continuing the mentoring program initiated by last year’s interns Sara DeLuca, Mabel Wu, and Rachel Neuhauser, with their QC DI/DPD Mentoring intervention and evaluation project. The Overview of the Dietetics Profession provided to third-year DPD student mentees was well received, with recommendations made to initiate one-to-one mentoring on the DI application process earlier in the fall of the fourth DPD year. Mentoring of the QC DPD students is now set to start in early fall 2019!

Continued on page 4
In addition, Ashley, Nicole, and Joanna submitted an abstract of their Outcomes project, in the category of professional skills, for the National Food and Nutrition Conference and Exhibition (FNCE) of the Academy of Nutrition and Dietetics (AND). It was selected for presentation at FNCE Philadelphia 2019!

Interns Laura Farrell, Adam Ross, and Ryan Gallagher focused on the trend of using phone app technology to track Food Intake in College Athletes for their Outcomes evaluation project. They conducted a cross-sectional evaluation of college athletes, performing qualitative analysis of athletes’ feedback after tracking their dietary intake for seven days. Results indicated that the majority of athletes found use of a food-tracking app an effective, efficient means to learn more about their dietary intake and potentially assist them in meeting their nutrition- and performance-related goals.

Interns Sabrina Zhou, Sarah Schwartz, and Ashley Olson implemented their Diabetes Nutrition Education and Skills intervention and evaluation: a program of diabetes nutrition lessons and skills workshops to address high rates of uncontrolled diabetes at an outpatient health center in New York City. Post/post-program evaluations indicated an increase in participants’ self-efficacy and management of their diabetes. Implementation of nutrition intervention programs across a greater number of health centers in the United States can potentially affect the diabetes epidemic by helping people manage their condition and reduce the consequences of poor blood-glucose control.
My Community Programs rotation at the American Heart Association was a unique, highly dynamic, impactful, and rewarding rotation. I was given an opportunity to start a nutritional health promotion program in a neighborhood with the most health inequities in NYC. My preceptor and I gathered, created, and presented a pool of nutrition resources for the NYC Housing Authority. I was also given the opportunity to work in public policy by collecting data on snack/beverage vending machines in Nassau County, NY to support a bill for healthy vending options and then lobby New York City Council members at City Hall for healthy food access!—Ashley Barrueco, RDN

I was able to experience a commercial hospital kitchen at St. Francis Hospital during my foodservice management rotation. I worked through the flow of operations of safety and sanitation, menu planning and forecasting, receiving and storage, preparation and production, service and delegation of employee tasks. I worked with the food and nutrition services director, operations manager/executive chef, clinical nutrition manager, supervisors, and the entire foodservice team. A unique aspect to SFH is their “room service system,” a trend in healthcare to provide the highest quality, personalized patient food service.—Nicole Castro, RDN

My Community Counseling rotation at St. John’s University allowed me to further develop both medical nutrition and counseling skills while addressing the nutritional needs of students and athletes. The experience promoted application of effective nutrition education and counseling methods in a diverse and unique setting.—Ryan Gallagher, RDN

At Mount Sinai Icahn Medical School, I worked with a team of researchers near the end of the five-year American Heart Association–funded study, the FAMILIA project, addressing cardiovascular health and risk factors in families of East Harlem. The rotation addressed my interests in dietetics research, counseling, and education as well as medical nutrition therapy. I completed a community needs assessment of a participating Head Start school that resulted in providing bilingual lessons on healthy eating on a budget to both parents and children. As an intern with the FAMILIA project, I was exposed to a variety of programs and initiatives in New York City, which further strengthened my interest in community nutrition issues.—Elizabeth Eisnor, RDN

I completed my Community Counseling rotation in a private practice setting at Alissa Rumsey Nutrition & Wellness P.C. This was a unique opportunity in which I was exposed to virtual nutrition counseling utilizing an intuitive eating approach. Alissa serves as a great mentor for many looking to start their own nutrition business. Through this experience, I learned the ins and outs of telehealth and growing an online nutrition business. My Community Programs rotation was completed at St. John’s University Campus Nutrition. Here, along with other interns, I developed the first fueling station for student athletes and provided various presentations on fueling for performance.—Laura Farrell, RDN

Food Service Management rotation at St. Johnland Nursing Center taught me the various ways of managing the needs of staff, residents, administration and other employees of the facility. This rotation put my people and organizational skills to the test every day, which I really enjoyed. There was also a retail component to this rotation where I was able to learn the strategies of running a successful retail business at the facility. I created a business plan, promotions, and budget with the goal of revenue in mind. This rotation taught me a great deal of business and personal skills that I will take with me into my future.—Adam Ross, RDN

Continued on page 6
I completed my clinical rotations at NYC Health + Hospitals/Elmhurst and Cold Spring Hills Center for Nursing & Rehabilitation. My rotation in acute care strengthened my clinical knowledge in the nutritional management of various diseases and nutrition support. This, in conjunction with interning in a long-term care setting, has provided me with a well-rounded experience that I know will be invaluable for my future in this field!—Renee Mazzotta, RDN

Elmhurst WIC Program was a great platform to develop community nutrition skills. I was able to really connect with the participants at WIC through food demonstrations, group education classes, and one-on-one counseling. My favorite activity was teaching new moms the benefits and skills of breastfeeding.—Ashley Olson, RDN

Pediatric clinical nutrition has always been a passion of mine. My Community Program rotation at Head Start with the FGE Food and Nutrition team gave me a new perspective on pediatric nutrition in a community setting. I developed a great understanding of community programs while also gaining clinical experience, performing pediatric nutrition assessments for children aged 2 to 5 years. I gained experience identifying nutritional risk for anemia, lead poisoning, asthma, tooth decay, underweight, overweight, and obesity. As child obesity is one of the greatest concerns in Head Start families, I developed a hands-on workshop on preparing healthy snacks for children and obesity prevention.—Nazish Pervez, RDN

During my foodservice rotation at Gouverneur Health, I was given the opportunity to work closely with the foodservice director as well as the entire kitchen staff. Under their guidance, I gained an understanding of management of a foodservice department and that it truly depends upon a team effort. I was part of the step-by-step process of how the food is purchased, prepared, and ultimately served to the residents at Gouverneur via a decentralized system using satellite kitchens. Kitchen and dining are near to residents’ rooms, providing a more homelike experience for them. My experience at Gouverneur truly opened my eyes to the role of a registered dietitian working in foodservice management.—Sarah Schwartz, RDN

The rotations at Mount Sinai Queens Hospital and Union Plaza Care Center allowed me to gain a wealth of hands-on clinical experience and improve my clinical knowledge. At the hospital I was able to apply knowledge of medical nutrition therapy directly to patients while under the supervision of a team of registered dietitians. At Union Plaza Care Center, I developed an understanding of the nutrition care process for geriatric patients with multiple co-morbidities and wounds. My experiences at both settings provided a foundation of skills that I will utilize in any future work as a dietitian.—Joanna Wytwer, RDN

I had the opportunity to intern at NYC Health + Hospitals/Coler for my general medicine and extended care rotation where I was able to build a strong clinical foundation working with the geriatric population and subacute units. I continued my clinical rotation at St. Barnabas Hospital Health System, gaining acute care experience especially in intensive care and surgical units. My clinical rotations strengthened my passion for clinical nutrition!—Sabrina Zhou, RDN
Preceptor News

In medicine and allied health education, a preceptor is a skilled practitioner or faculty member who supervises students in a clinical setting to allow practical experience with patients. Our preceptors make a difference in the lives of our interns who are learning to become Registered Dietitian Nutritionists by acting as mentors and training dietetic professionals of the future. 1, 2

Risa Jaslow, MS, RDN completed a DI and holds a master’s in human nutrition from Ohio State University. She has been a practicing RD for twenty-two years. She began her career in clinical work, a contrast to her interest in preschool nutrition and policy. She is passionate about affecting the nutritional habits of kids from a young age. Risa currently works at Mount Sinai Icahn Medical School as the project manager of FAMILIA, an American Heart Association–funded research project in East Harlem. She oversees a multidisciplinary team that implements programming, collects data, and applies findings related to cardiovascular health and risk factors among East Harlem families.

Alla Polishchuk, RDN has nineteen years of clinical experience and is chief clinical dietitian at Union Plaza Care Center. She supervises two full-time dietitians and is responsible for resident nutrition assessment, policies, and procedures as well as contributing to department head meetings such as quality assurance and improvements. Alla’s nutrition interests includes geriatric nutrition and lifestyle change.

Elaina Munoz, MS, RDN, CDN has been an RD since 2001. She holds a bachelor’s degree in food and nutrition from Hunter College and a master’s in nutrition education from Queens College, and is a graduate of the Aramark Dietetic Internship. Elaina is employed by Compass Group as director of food and nutrition at St. Johnland Nursing Facility, where she is responsible for all clinical and management operations of a team of about fifty employees, including policies and procedures, compliance with regulatory agencies, recruiting, and human resources. Elaina’s professional interests include working with people and clinical and renal nutrition.

Reyna Franco, MS, MBA, RDN, CDN, CSSD, CLT, FAND, CPT has been an RDN for fourteen years. As of July 2019, she is president of the New York State Dietetic Association. She received her master’s in exercise physiology and nutrition from Columbia University, and is a certified specialist in sports dietetics, certified LEAP therapist, and certified personal trainer. She owns a private practice providing sports nutrition counseling and medical nutrition therapy and is also the corporate wellness dietitian for a large advertising agency. Her favorite aspect of nutrition counseling is watching her clients meet their goals through healthy eating, which can include reducing medications, improving health or winning a race.

Gloria Gallego, RDN, CDN, IBCLC holds a bachelor’s in nutrition and dietetics from the University of Antioquia in Colombia, where she worked as a nutritionist for ten years before coming to the United States. She has been working as an RD and certified lactation consultant for about six years, and is in the process of obtaining certification in childhood and adolescent weight management. Gloria currently works at NYC Health + Hospitals Elmhurst WIC as nutrition and breastfeeding coordinator. Her special interests are breastfeeding advocacy, nutrition policy, and community services.

Monica Schmitt RDN, CDN is the clinical nutrition manager at Elmhurst Hospital. She received her bachelor of science in nutrition from Plattsburgh State University, and completed her dietetic internship at Sage College. She began her career at Elmhurst Hospital in 2012 as a clinical dietitian. Prior to returning to Elmhurst, she worked as the assistant clinical nutrition manager at Lenox Hill Hospital for three years. She is excited to be back at Elmhurst working with their amazing food and nutrition team. In her spare time Monica enjoys cooking, dancing, yoga, and exploring New York.

Angela Komis, RDN, CDN has been an RD since 2008, and is in the process of obtaining her master’s in nutrition at New York Institute of Technology. She is assistant director of nutritional services and clinical nutrition manager at Gurwin Jewish Nursing and Rehabilitation Center. She plans to pursue the credential for a certified diabetes educator.

1 Florence Myrick and Olive Yonge, Nursing Preceptorship: Connecting Practice and Education (Lippincott Williams & Wilkins, 2005), p. 4.

Continued on page 8
Alissa Rumsey, MS, RDN has been an RDN for eleven years. She holds bachelor’s degrees in dietetics and exercise science and a master’s of science degree in health communications. She is certified as a strength and conditioning specialist by the National Strength and Conditioning Association and is a certified intuitive eating counselor. Her private practice focuses on intuitive eating, body image healing, and disordered eating recovery, helping people cultivate a healthy relationship with food and their bodies. She also helps dietitians start and grow their own businesses through mastermind retreats and business coaching workshops.

Renata Shiloah, MS, RDN, CDN has been working as an RDN for seventeen years and is pursuing a doctorate in clinical nutrition. She is currently responsible for development of nutrition programs, and works with a team of primary care, social work, podiatry, dental, pediatrics, and medical professionals as well as certified fitness trainers. She provides individual and group nutrition education and counseling focusing on chronic disease prevention and management, overseeing all aspects of a busy outpatient clinic nutrition practice including marketing, billing for services, and coordination of nutrition employees, interns, and volunteers. She especially enjoys working with adults to manage weight and metabolic syndrome.

Fern Estrow, MS, RDN, CD is founder of FGE Food and Nutrition Team, and works as a community dietitian with Head Start families. She completed her first bachelor’s degree in arts and a second in nutrition. She has been a preceptor of dietetic interns since 2001. On the first day of the community rotation, she takes interns on a market tour to taste different foods so that they will become comfortable with various cultural foods. One of Fern’s primary aims during the rotation is to promote respect of one’s own culture while being open to learning from other cultures.

Arlene White-Tucker, MS, RDN, CDN has been an RDN for more than twenty years. She is currently a clinical nutrition manager at NYC Health + Hospitals/Coler, an 850-bed extended-care facility. She received her undergraduate degree in nutrition from Lehman College, CUNY and her master’s in clinical nutrition from Lehman College and New York University. She has had a special interest in nutrition support since she was a dietetic intern, and is currently working on renewing her CNSC credential.

Cecilia Moy, MS, RDN is clinical nutrition manager at St. Barnabas Health System. She believes that every intern needs a good starting point and that St. Barnabas Hospital can provide a strong platform of growth and experience. Interns can present preceptors with the latest knowledge, keeping them informed, too. A main focus of Cecilia’s is addressing health issues of the Bronx community through educational outreach on life skills such as cooking and controlling carbohydrate intake for diabetes. Cecilia aims to inspire others to keep up with current nutrition research and put it into practice.

Shanon Morris, MS, RDN has been practicing as a registered dietitian for eleven years. She has a BS in nutritional sciences from Howard University and a master’s in applied physiology and nutrition from Teachers College, Columbia University. She is a certified CrossFit Level 1 coach as well as author of the children’s book MC Veggie Fresh Rocks the Mic. Current responsibilities include management of community-health-related work of the American Heart Association, New York City, with a focus on improving blood pressure and healthy food access. Her love for dietetics will always be in building healthier communities. She enjoys working with children, particularly cooking with them!

Anthony Baffo, PhD obtained his bachelor’s in hospitality administration/management and master’s in business administration from New York Institute of Technology, and his doctoral degree in strategic leadership and healthcare leader development from Regents University. He is director of food and nutritional services at St. Francis Hospital, where his responsibilities include overseeing and directing department staff operations and services, budget planning and development, and ensuring compliance with nutritional, safety, sanitation, and quality standards, following all state and federal requirements. He is also an adjunct professor in the Long Island University-Post Department of Nutrition.
Sara DeLuca, RDN went full throttle building her private practice after graduation. As a personal trainer, group fitness instructor, and now a registered dietitian, Sara has been able to successfully combine her three loves into her dream job! In addition, she is now campus dietitian at Manhattan College where she works with students, athletes, and many campus nutrition activities. She is also a freelance writer for health magazines.

Wing Yee Cheung, RDN completed the Dietetic Internship in June 2018 and passed the RD exam in August! She was hired as a clinical dietitian at Mount Sinai Hospital, Astoria where she completed her clinical rotation of the internship. Wing’s daily tasks involve nutrition assessment, including the Nutrition-focused Physical Exam (NFPE) for malnutrition, and counseling for the heart-healthy, diabetes, and renal diets. This year, she was fortunate enough to be a preceptor for one of the Queens College Dietetic Interns, and is looking forward to working with incoming interns in the fall!

Lauren Rubin, RDN! Not only did she earn the credentials that she had worked so hard for, but now she can officially help others improve their health through food and nutrition. As the Queens College Dietetic Internship helped instill within her a love for community nutrition, she has been working at local high schools, designing and implementing nutrition curricula. Some of the topics covered include “Fiber Focus,” “Heart Healthy,” and “Knowing My Plate and Your Plate.” Teaching the students has been very rewarding. Her future plans include working in a clinical setting and gaining the CDE credential.

Angela Vita, RDN was hired as a retail dietitian at ShopRite of Bruckner Boulevard in the Bronx. There she conducted nutrition workshops, cooking classes, and one-on-one consultations. After spending about a year at ShopRite, she recently accepted a position as outpatient clinical dietitian at Lincoln Hospital. She is working on developing the menu of a colleague’s grant-funded vegetarian food truck, and her next goal is to obtain her MPH in nutrition within the next few years.

Rachel Neuhauser, RDN has spent her year getting started on her private practice specializing in weight management and medical nutrition therapy. She has also had the opportunity to travel and spend time with family and friends.

Mabel Wu, RDN began working as a full-time clinical dietitian at Bellevue Hospital Center. She is learning new things every day! Mabel’s passion remains childhood obesity and preventative care, including taking part with fellow dietitians in a training program in childhood and adolescent weight management in Wisconsin.

Paying the RD exam was one of the highlights of the year for Lauren Rubin, RDN! Not only did she earn the credentials that she had worked so hard for, but now she can officially help others improve their health through food and nutrition. As the Queens College Dietetic Internship helped instill within her a love for community nutrition, she has been working at local high schools, designing and implementing nutrition curricula. Some of the topics covered include “Fiber Focus,” “Heart Healthy,” and “Knowing My Plate and Your Plate.” Teaching the students has been very rewarding. Her future plans include working in a clinical setting and gaining the CDE credential.

Elizabeth Joa, RDN studied for the RD exam, passing on her first try in August 2018! Her experiences from the rotations, assignments, quizzes, and classes were extremely helpful in preparing her to become a registered dietitian. She moved to Memphis, TN where she is working at a church with a student ministry. Elizabeth plans to continue with her CPEUs, and looks forward to taking on a nutrition position wherever she may be.
During the summer after graduation, **Grace Kim, RDN** studied for and passed the RD exam and obtained the CDN certification. She worked at a long-term care and rehabilitation facility in Brooklyn for about one year, and was recently hired as an RD for Morrison’s (Compass Nutrition) assisted living. It has been a great learning experience, balancing the clinical, practical, and quality-of-life aspects of nutrition. Grace loves working closely with all the nutrition staff and the residents!

**After Irina Kravtchenko, RDN** completed the Dietetic Internship, she juggled studying for the RD exam and planning her wedding. Upon passing the exam, she was hired as a full-time RD, working in an outpatient treatment program for substance abuse. Irina strives to help individuals improve their chance of recovery by promoting a healthy lifestyle through weekly nutrition groups, individualized nutrition counseling, and MNT. Her next goal is to obtain a master’s in nutrition to advance her knowledge and growth in the field.

After completing the Dietetic Internship at Queens College in the spring of 2017, **Amal El-Rowmeim, RDN** passed the RD exam that July. Since then she has been traveling between Malaysia and New York. While she has not yet searched for a job, she has been exposed to a whole new culture and learned quite a bit about Southeast Asian cuisine and food habits. Amal anticipates returning to New York by the end of 2019, and hopes to kick-start her career within an acute-care setting.

**After the Dietetic Internship, Kelsey Macalusco, RDN** was hired at Mather Hospital as a clinical RD. She worked on multiple projects for Nutrition Month in March, and created teaching kitchens for the hospital staff. Kelsey was then hired at Huntington Hills Rehabilitation and Nursing Center as a full-time RD. Kelsey plans on working toward a master’s in public health.

**Nelcy Mylonas, RDN** graduated the DI in June and obtained her RD in August 2018. She began working with a company that hires dietitians as consultants for nursing and rehabilitation facilities. This working environment has provided professional growth and learning every day while providing MNT to the residents. After spending about one year in this role, Nelcy accepted a position as an outpatient RD at Urban Health Plan!

Welcome new Dietetic Interns for 2019–2020!

We look forward to publishing program highlights of the current 2019–2020 Queens College Dietetic Interns, pictured above on the first day of their program, in next year’s issue of the QC DI News!
