The Biomechanics laboratory is located at Fitzgerald Gymnasium 219. The laboratory is equipped with 3-D motion analysis system including 8 infra-red cameras, two force platforms, and a wireless EMG system. Dr. Ya Ching Hung is the current director of the laboratory. She is also an experienced physical therapist. She studies how children with and without physical impairments control their movements and improve their impairments in movement control after various trainings. Some of her recent publications are listed below:
