Update on Psychiatric Disorders in Children and Adolescents

The morning session will review the psychiatric disorders that school psychologists most frequently encounter, particularly attention deficit hyperactivity disorder, the anxiety disorders, panic disorder, and depression. We will review the presentations of these disorders and the most up-to-date approaches to treatment. Controversies, such as childhood bipolar disorder, will also be reviewed.

What You Need to Know about the Treatment of Psychiatric Disorders of Children and Adolescents

This afternoon session will review the behavioral treatments and psychiatric medicines used to treat the most common psychiatric disorders of children and adolescents. We will focus particularly on the stimulants, alpha agonists and Strattera for ADHD, and the SSRIs for depression and anxiety disorders. We will review how to think “psychopharmacologically” and review the uses and side effects of each class of medicine.
ABOUT OUR KEYNOTE SPEAKER
