Keynote/Part I
10 am–12 noon

What we need to know about the effects of media on the health of children and adolescents

We often don’t ask about media use, yet children and adolescents spend 7–11 hours per day with a variety of media. Media can have a wide-ranging influence on a number of health concerns, such as aggression and obesity. Those of us who work with children and teenagers need to be aware of the impact of media on these key health issues. This presentation will examine these negative effects and suggest solutions that might mitigate the impact. Session one examines media use and the effects of media/video game violence.

Keynote/Part II
1:45–3:15 pm

What we need to know about the effects of media on the health of children and adolescents

The second part of this session examines online risks like cyberbullying and pornography. Given the potential impact of media on children and adolescents, what are solutions to reduce these harmful effects? We will look at possible solutions, such as governmental regulation, rating systems, and media initiatives.

ABOUT OUR KEYNOTE SPEAKER

DR. DONNERSTEIN'S major research interests are in mass media violence, as well as mass media policy. He has published over 240 scientific articles in these general areas and serves on the editorial boards of a number of academic journals in both psychology and communication. He was a member of the American Psychological Association’s Commission on Violence and Youth and the APA Task Force on Television and Society. He served on the surgeon general's panel on youth violence, as well as on the advisory council of the American Medical Association Alliance’s Violence Prevention Program. He is a past President of the International Society for Research on Aggression and recently served on their Commission on Media Violence. In 2008, he received the American Psychological Association Media Psychology Division Award for Distinguished Scientific Contributions to Media Psychology. In addition, he was a Primary Research Site Director for the National Cable Television Association's $3.5 million project on TV violence.

He served as Dean of the College of Social and Behavioral Sciences at the University of Arizona from 2002–2009. He was also Dean of Social Sciences at the University of California-Santa Barbara, as well as the Rupe Chair in the Social Effects of Mass Communication. He is currently Dean Emeritus and Professor Emeritus at the University of Arizona. He has testified at numerous governmental hearings, both in the United States and abroad, regarding the effects and policy implications surrounding mass media violence and pornography, including testimony before the United States Senate on TV violence. He has served as a member of the United States Surgeon General's Panel on Pornography and the National Academy of Sciences Subpanel on Child Pornography and Child Abuse.
