

Accessibility Assistive Technology: Sections 255, 508

Assistive Technology Lab & Services

Technology has become an integrated part of the academic experience. The Assistive Technology Services Center, located in Frese Hall, Room 012, is dedicated to ensuring accessibility to technology to students with disabilities.

The AT Lab is provided by the Office of Special Services. The hours are the same as that of the OSS. The lab offers numerous technologies to assist students with disabilities. The various services available are listed below:

- Braille equipment for brailing books, texts, and tests
- Zoom Text for enlarging the text
- Larger computer screens for visually impaired students
- Laptop lending program
- Equipment lending program (audio-enhancers, headphones)
- Kurzweil 3000
- Jaws, Dragon, CCTVs
- V-Tech Enlarger

Students using the lab need to sign in and out. You can call The A.T. Coordinator or ask for assistance.

Accommodations and supportive services depend on the disability and the level of support each student requires. For example, if a student has dysgraphia, or cannot write the notes due to a learning or physical disability, we will assign the student a note-taker. If the student is visually or hearing impaired, we will provide them with a laptop that has the software capable of addressing the particular disability, such as enlarging text, voice control, and organizational planning
