

## Queens College Biology Department Colloquium Series Spring 2024 — Wednesdays at 11:10am

	<u>Host</u>
Feb 7 Mark Stoeckle, Rockefeller University - Mid-Atlantic Fishing with Environmental DNA (eDNA): Successes and Challenges	Waldman
Feb 14 Austin Gray, Virginia Tech - Origin, Fate, and Impact of Microplastics in Freshwater Ecosystems (Zoom)	Dennehy
Feb 21 <b>Melina Giakoumis</b> , American Museum of Natural History - <b>Population Genomics</b> , Ecology & Conservation of Asterias Sea Stars in the North Atlantic	Waldman
Mar 6 Ian Fish, Plum Island Animal Disease Center - FMDV Superinfection Promotes Hybrid Progeny Viruses	Freilich
Mar 13 Stephen Gosnell, Baruch College - Environmental & Cultural Impacts of Oyster Restoration in New York & Next Steps	Waldman
Mar 20 Monte Neate-Clegg, University of California Los Angeles - Explaining Variation in Responses of Birds to Global Change (Zoom)	Coleman
Mar 27 Monica Trujillo, Queensborough College - Elucidating the Biology of Bacterial Lifestyles Using Continuous Cultures	Dennehy
Apr 3 Pablo Castillo, Albert Einstein College of Medicine - Presynaptic Protein Synthesis & Synaptic Plasticity	Trujillo
Apr 10 Merry Camhi, Wildlife Conservation Society - Swimming with Sharks: Realities & Misperceptions	Waldman
Apr 17 Mariana Torrente, Brooklyn College - New Targets in Neurodegenerative Disease: Focus on Histone Post-translational Modifications	SDunn
May 1 Elena Paredo, Rochester Institute of Technology - Habitat Transitions as Drivers of Evolution in Plants	Alvarado
May 8 Dan McCloskey, College of Staten Island - The Calming Effect of Social Behavior in African Mole-rats	Alvarado
May 15 Bobby Habig, Mercy University & Queens College - Anatomy of an Urban River: The Bronx River as a "Laboratory" for Student Research	Lahti
