Fall 2023

Instructor: Beeler

PSYCH 381/791

Special Topic

neuroscience

**machine
intelligence**

culture

philosophy

evolution

Tues 1:40 to 4:30

No prerequisites

This seminar course focuses on exploring consciousness from several perspectives, including philosophy, neuroscience, evolution, psychology and culture, and machine learning/artificial intelligence. The format will be primarily discussion about the readings with short lectures to clarify the material and facilitate discussion. The course is open to students with different academic backgrounds, from philosophy to psychology, biology, and neuroscience to computer science.
