Spring 2025 Peer Mentors and Advisors

(Justin Adamson, Emily Albines, Candace Anderson, Victor Barrientos, Jennifer Chen, Kristine Mikhaylov, Caleb Stewart, Yaacov Strickon, Adriana Zumba-M)

School of Earth and Environmental Sciences, QC

This semester, seven peer mentors were divided between the lecture sections of Ensci 99, Ensci 100, and Geol 101. To increase student success and engagement in these classes, they hosted weekly office hours, held exam review sessions, led supplemental demonstrations, delivered concept recaps, and so much more. Alongside our peer mentors, our department's two peer advisors have developed projects and coordinated events to improve the career preparedness of and sense of community amongst our students. Join us at the colloquium to hear personal anecdotes from the students and learn more about the impact of our peer program!
