

Campus Planning, Construction & Design

On Going and Current Projects

Fall 2025

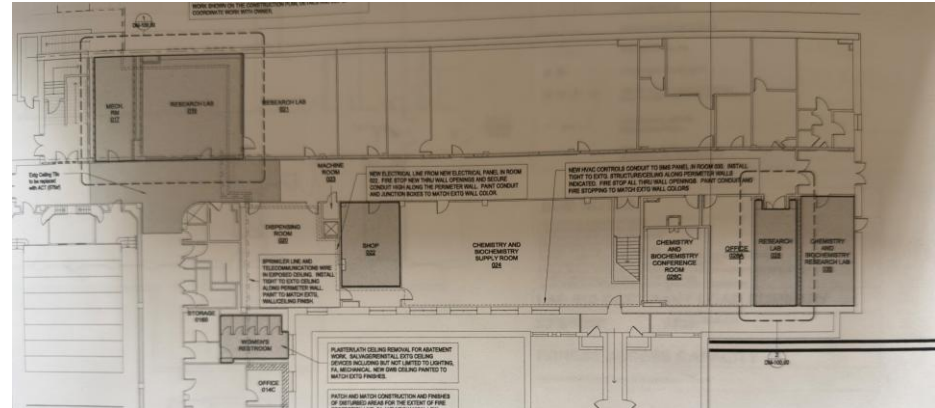

Delany Hall – Building Envelope Restoration

Exterior stucco repair, window replacement, roofing work, and associated work to restore the building envelope and protect interior systems. Due to this work exterior scaffolding, periodic rerouting of pedestrian paths, and access restrictions near work zones. Began Summer 2025

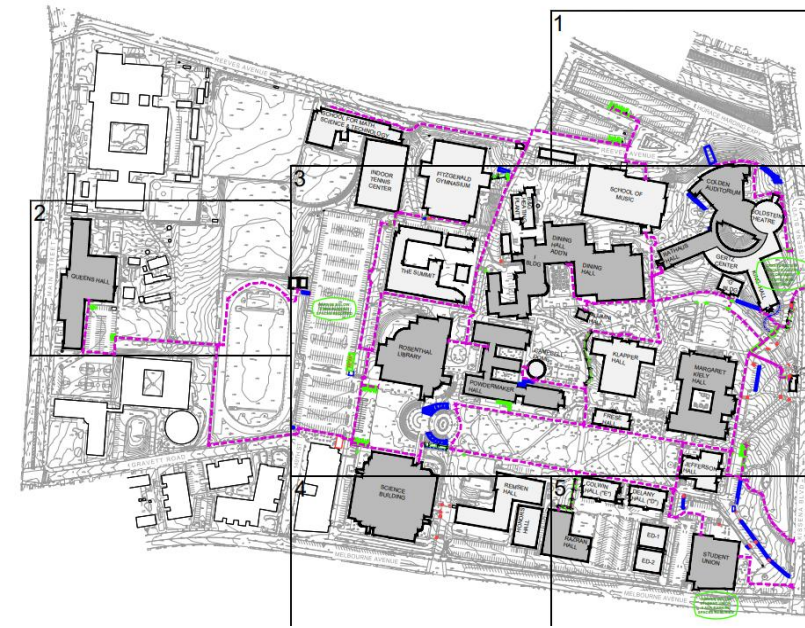

Remsen Hall and SB – Environmental Lab Renovation

Comprehensive renovation of chemistry and environmental labs in Remsen Hall and Science Building, including upgraded MEP systems, safety features, and lab casework. Due to this project, there may be temporary limited access to areas; impacted departments will be notified and supported. Ongoing through Fall 2025

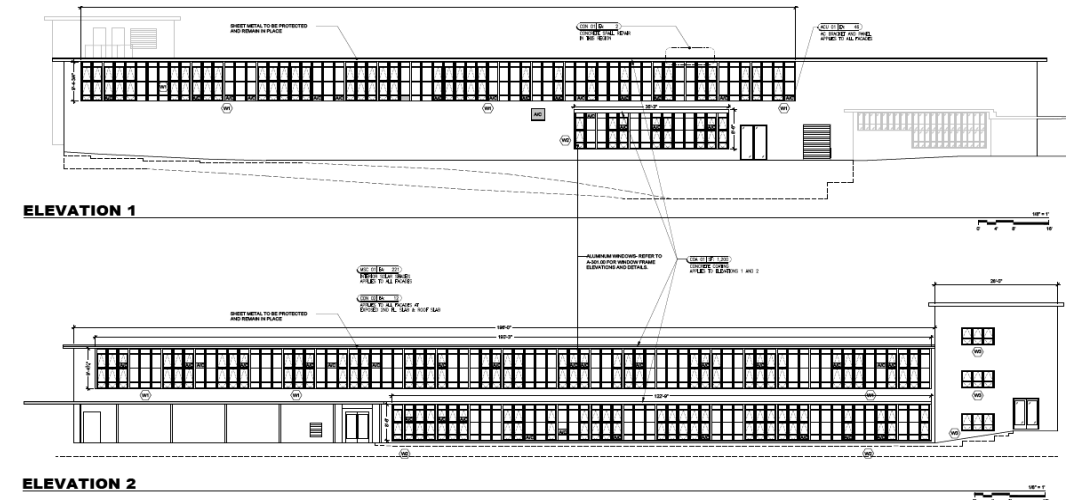

Campuswide ADA Exterior Accessibility Project

Installation and upgrades of accessible ramps, paths, and entry points throughout campus to meet current ADA standards. Due to this project, there may be temporary closures or detours along major walkways; accessible alternatives will be clearly posted. Starts Fall 2025.

King Hall – Window Reconstruction

Full replacement of all exterior windows in King Hall to improve energy performance, climate control, and building appearance. The project will require phased access to classrooms and offices during installation; work will be scheduled to minimize disruptions. Starts Fall 2025

Queens Hall – Library Renovation to Office Space

Conversion of the former library space into new administrative and clinical office suites. There are no expected interruptions to campus operations. Began Summer 2025

Elevator Modernization – Razran Hall & Rosenthal Library

Full replacement and modernization of all elevators in Razran Hall and Rosenthal Library, including mechanical, electrical, and accessibility upgrades. This project will be phased carefully to minimize disruption to building access and service continuity. Due to this project some elevators will be offline at different stages; building occupants will be notified in advance. Starts Fall 2025

Parking Fields 15 N&S - Drainage and Resurfacing

Installation of stormwater drainage and resurfacing of asphalt surfaces. This project will require trenching within the lots and replacement of the existing asphalt surface. The lots will remain accessible outside of the work areas. Starts Fall 2025.
