

LEARN ABOUT

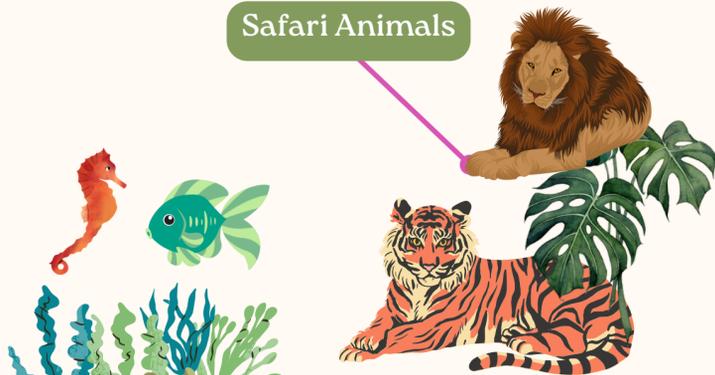

Our Amazing Ecosystem

An ecosystem is a community where plants, animals, and other organisms work together to survive.

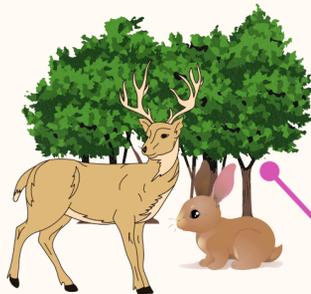

Take a look at our book selection to learn about our Ecosystems!

Safari Animals

Marine Animals

Forest Animals

There are lots of different ecosystems: Forests, Oceans, Deserts, Grasslands, and different types of plants and animals in each!

Every single thing in our ecosystem is important! BIG or small!

Plants come in all shapes and sizes! From trees over 380 feet tall, to tiny plants smaller than a grain of rice!!!

Did you know?

Plankton, bacteria, eggs, and larvae are all tiny enough to live in just 1 drop of water!
