

What Happened to the Queens College Graduates of 2025?

Summary Report

Spring 2026

Summary

By combining results from multiple data sources (gathered no later than 6 months after graduation), including records from the CUNY Cap and Gown Survey (11%), the First Destination Survey (5%), and the National Student Clearinghouse (21%), we were able to obtain outcomes information on 40% of the undergraduates and 31% of the master's graduates from the Class of 2025 –an overall knowledge rate of 37%.

About the Data

The National Student Clearinghouse (NSC) has data on enrollment, degrees earned, and schools attended for 98% of all US College students. The CUNY Cap and Gown survey (C&G) asks graduating students about their educational and employment plans, career preparation, satisfaction with their college experience, and their curricular and co-curricular experiences. All students that apply for graduation gain access to this survey in CUNYfirst and about a third of our students respond. For the Class of 2025, the response rate was 27%. The OIE administers the First-Destination Survey (FDS) to the previous graduating cohort every Fall semester. This survey asks graduates about their career activity six months out from graduation, including types of employment and starting salary. The response rate for the Class of 2025 was 7%.

The OIE merges the results from these data sources and reports the findings to the National Association of Colleges and Employers (NACE). Since the First Destination Survey (FDS) and National Student Clearinghouse contain the most recent outcomes, results from these sources are prioritized above others. Results from the Cap and Gown Survey are incorporated when no other data were available on the status of an alumnus.
